EXPERIENCE

Trilogy Education, Remote— *Tutor*

August 2019 - PRESENT

I assist students who are enrolled in the Trilogy Coding Boot Camp with concepts and technologies that are taught in the class.

EDUCATION

University of Central Florida

Full Stack Web Development Course

October 2018 - May 2019

Completed an intensive 24-week web application development program focusing on HTML, CSS and JS through the MERN stack.

Brevard Community College, Associate's Degree

August 2008 - May 2010

PROJECTS

Teammate Finder — *MEAN Stack*

Angular application which matches online gamers with players who play the same console at a similar skill level. Uses JSONwebtokens and Bcrypt with MongoDB for user authentication. Angular with SASS stylesheets. Admin page for creating/deleting games in the database and handling user suggestions for games to add.

teammate-finder-app.herokuapp.com/

Rover Reddit — *MERN Stack*

React application which interfaces the MARS OpenApi from NASA with a social networking platform. I spent most of my time on this project developing the interactions between OpenApi, User Interface, and MongoDB. I also developed the flipbook effect for the image display.
