Projects

Rover-Reddit, MERN Stack Application

May 2019

Uses the NASA Open API to deliver to users the entire catalog of rover images. Also scrapes space.com/news to deliver articles. Images and articles can be saved, shared, and commented on by users.

<https://github.com/DavidWeid/Space-Pair-Project>

Teammate Finder, MEAN Stack Application

October 2019

This Angular website allows users to track games they play on various consoles and to find others who play those games at a similar skill level.

<https://github.com/Mvcampbell3/find-a-tm>

Yahtzee-React, MERN Stack Application

July 2019

Recreates the classic game of Yahtzee. Uses 3-D CSS animations for rolling the dice. The score is tallied automatically when the player presses the button for the score they want to keep.
