Michael Campbell

Front-end web developer looking to join a top-notch team and launch a career in web development using technologies like React and Angular 2+

EXPERIENCE

Trilogy Education *Tutor — Remote*

August 2019 - PRESENT

I tutor students enrolled in the Trilogy Boot Camp on Full-stack JavaScript development including React, Node, Express, MongoDB, and MySQL.

PROJECTS

Teammate Finder *— MEAN Stack*

 - Application which helps online multiplayer gamers find others who play the same games on the same consoles at close to the same skill level. Admin page for database control and user suggestions.
 - Angular application made with Express, MongoDB , and NodeJS. Uses JSON web tokens and Bcrypt for user authentication. SASS stylesheets.

teammate-finder-app.herokuapp.com

Rover Reddit *— MERN Stack*

 - Application that interfaces NASA's Mars OpenApi with a social networking platform. Users can view, save, and share images from Mars rovers Spirit, Opportunity, and Curiosity.
  -React application made with Express, MongoDB, and NodeJS. Scrapes Articles from space.com/news using Cheerio and Axios.
